

Brock Mellema

Project Manager

With 9 years of construction management experience Brock is a valuable asset to the project team. His experiences include new multi story health care facilities, interior office buildouts, advanced technology and industrial/manufacturing additions and renovations including pre-engineered metal buildings.

Experience in preconstruction, project management and everything in between has given Brock the ability to successfully take a project from conception to completion. With a customer focused approach Brock provides conceptual budgeting, constructability reviews and value analysis to the design consultants to ensure the team delivers value without compromising quality. As project manager Brock oversees the entire project to ensure quality, cost, schedule and safety goals are achieved.
